

PSvdL
CONSULTING

You are looking for exciting new tasks in a creative environment? You want to make a difference and actively participate?

In our team at PSvdL Consulting, many different and creative minds work together on a wide range of topics: with our management consultancy, we advise nationally and internationally leading companies in the energy industry. We cover all areas of a modern management consultancy: Program and project management, creation of strategic concepts, digitalization of core energy industry processes, introduction of new business processes and organizational forms, PMO services as well as functional support of IT projects. In addition, we actively shape the energy market, for example by implementing our own products or establishing innovative business models.

Based on our long-standing business relationships with renowned European energy suppliers, new and interesting project opportunities are continuously arising. In order to meet this increasing demand for our consulting services, we are looking for employees with entrepreneurial spirit, creativity and their own ideas who want to help shape our future. We offer you an employment contract tailored to your requirements with performance-oriented, excellent remuneration as well as an attractive work-life balance that is truly lived.

Your future role – Thesis (Bachelor/Master)

As a bachelor or master student, you will gain practical experience in projects at our customers in close cooperation with our consultants and you will bring your thesis to a successful conclusion together with a permanent contact person at PSvdL Consulting. You are a full-fledged team member from the beginning and therefore have a direct influence on our success and future development. Your creativity, enthusiasm and ideas can form the basis for further cooperation even after your graduation.

This is the profile we are looking for:

- Very good academic performance in university/ university of applied science study
- Great interest in the European energy industry and policy
- Independent work, analytical skills and great personal commitment
- First experience in the energy industry or at a consulting firm
- High level of teamwork and communication skills (in German and English)
- Confident handling of MS Office applications

We look forward to receiving your application by mail. If you have any questions, please contact Philipp directly.
